

# SECOND GRADE NEWSLETTER

April 2025

## ENGLISH LANGUAGE ARTS

In Reading, students will learn about the growth of plants and what they need to thrive. Learning about plants and how they grow is likely to ignite a spark of curiosity in a child's mind.

As students read, view, and interact with the texts and media in this module, they build deep topic knowledge about what plants need to live and grow.

In Writing, the students will write a procedural text. The Focus Statement for this unit is : Some activities, like planting a seed and caring for it, happen in the same order every time. The students will think about an activity that needs to be done in a set order.

They will describe the activity in a paragraph and write the steps in a list.

## MATH

In Topic 10, students will add within 1,000 using models and strategies. Students will use hundreds charts, number lines, place-value blocks, and partial sums as strategies to help them add .

## SCIENCE/SOCIAL STUDIES

In Science, students will be learning about what plants need to live and grow.

In Social Studies, students will continue to learn about New York City over time. They will learn about the geography of New York City and how maps help us.
